A LITTLE INFORMATION - ABOUT US

It all started in 1967 for ProjectionDreams, when a younger Vincent Myers saw the "cinema" version of Robert Shaw's "Custer of the West" at the Odeon in Leicester Square. This was the trigger that launched what is now Portugal's Premier Audio / Visual Installer.

Working at the world famous company ARRI, whose cameras were used in the filming of many box office goliaths such as the original Star Wars trilogy, Vince's passion for sound and vision grew (an excellent grounding from which ProjectionDreams was born).

Now, based in the Algarve, Portugal, ProjectionDreams has gone from strength to strength and is now the only audio / visual company in Portugal to have not one, but three, full Dolby Atmos cinemas on demonstration in Almancil, Carvoeiro and Praia da Luz in the west Algarve.

The ProjectionDreams professional team includes members who are ISF qualified, THX certified, all of whom follow the principles of the company as set down by Vincent Myers.

ProjectionDreams was the first audio / visual company in Portugal to have designed, constructed and completed a themed cinema in Quinta do Lago in the style of the Stargate and was the first to design and construct a completely, totally curved cinema.

Over the years, ProjectionDreams has added to its portfolio of professional suppliers, installers, construction teams and design professionals, even manufacturing its own cinema chairs, a "flushfit" panel system, noise reduction panels, star ceilings, acoustic treatment system and even its own custom cinema screens in any size to introduce the best in audio / visual technology in all installations, whether they are a large screen television through to a full home cinema.

The recent introduction of the "CineLounge" option ensures no disturbance to the aesthetics of the lounge - in short, hidden audio / video systems.

Finally, for those looking for fun and enjoyment, ProjectionDreams can create an entertainment room to include authentic looking Juke Boxes, large screen televisions, snooker tables - we can even arrange pictures of your favourite film stars, football players all in "Diasec" - a revolutionary process which encapsulates the image in a hard-wearing frame, ready to be mounted in any position for optimum effect.

THE ELEMENTS OF A - CUSTOM HOME CINEMA

The position...

Cinema viewing position is critical to ensure a true immersive experience. ProjectionDreams use "Cinema 360" ideology which includes THX and SMPTE criteria to establish the ideal seating position and viewing angle.

Interior design to suit you...

Leave it to the ProjectionDreams design team to come up with a plan or tell us your thoughts and we will do the rest. Allow your imagination to come alive.

Comfort to enhance viewing pleasure...

They say the chair makes the cinema. Well - ProjectionDreams makes the chair to suit you! Any material, any size, any colour, recliner, sofa - we can make them all to fit you and your style.

Sound you can really feel...

ProjectionDreams has tied up with companies including Aurea to create a home cinema that sounds as real as if you were in the film, using the latest sound codecs including Dolby Atmos.

A bold & dynamic picture you could almost touch...

Using the latest 4K and laser projectors and the best screens, ProjectionDreams ensures that your viewing pleasure is the best, whatever the film you are watching through skillful calibration to ISF image parameters.

Keeping the sound in and keeping the sound out...

As part of the construction process, ProjectionDreams can include acoustic panelling to ensure the cinema room is a neutral audio playing field and sound proofing to reduce sound outside the home cinema.

AUDIO / VISUAL ELEMENTS FROM PROJECTIONDREAMS

Sound bars & sound bases - surround sound without lots of speakers...

With virtual surround sound, a sound bar or sound base from ProjectionDreams can sit neatly under your television, on a shelf or be wall mounted giving incredible sound effects.

Sit on the terrace, enjoy a barbecue, listen to music anywhere in your home, or even watch a movie in the bedroom or kitchen with one of the media server solutions from ProjectionDreams.

Multi-room audio and video solutions...

Digital sound with the look of nostalgia...

If you are looking for something completely different, a Sound Leisure Juke Box from ProjectionDreams could be just the ticket. Stylish and made with quality materials and with an authentic 50's sound and design.

An image you can count on...

On behalf of Sony Europe, the first 4K projectors were setup by ProjectionDreams. The quality of all projector and television installations is governed by the ProjectionDreams set up standard.

4K projectors / TV's - the best for the best...

ProjectionDreams use 4K and 3D displays, from brands like Sony Professional. Correct viewing angles and custom IMAX enhanced screens are used in all cinema installations to achieve the perfect picture.
